Opening Roofs and Louvres

Create genuine, year round usable indoor - outdoor spaces with a custom made LouvreSpan Opening Roof. Transform your deck, verandah, patio, BBQ area, spa or swimming pool areas. Set and control conditions as you choose - all at the touch of a button.

Overhead A 180 aluminium Opening Roof provides light and ventilation to a pool area.

Vertical Motorised 180 Airfoils - sun, shade or privacy. The choice is yours.

Corners The dramatic affect of Bracket Fixed 120 Airfoils, with mitred-cantilevered corners.

Traditionally sun louvres have been applied to buildings to intercept and create a barrier to the sun's rays. Here, End Fixed 120 Airfoils provide shade with stunning effect.

Airfoil Sun Louvres

The LouvreSpan range of classic Airfoil Sun Louvres provide new stylish sun, wind and privacy control options. Choose from six louvre sizes from 70mm - 600mm. Hand opening or motorised End Fixed or Bracket Fixed Blade spacings and pitch set exactly to meet your requirements.

Opening Roof & Louvres

Opening Roof Motorised 180 aluminium roof shown here partially opened giving filtered sunlight.

The same roof shown open, at night to watch the stars.

Mini Louvres & Shutters

Introducing LouvreSpan's 70mm Mini-Louvres & Shutters. The new Mini-Louvre range provides an all aluminium interior and exterior option to timber louvres. Clean finely shaped blades provide outstanding strength and spanning characteristics. Ideal in the harshest of environments. Superb powdercoat or natural anodised finishes allow you to throw away the sandpaper and paint brush.

Privacy and shade Sliding 70mm adjustable Mini-Louvre window shutters (above) can be opened, close or stacked away.

Cavity Sliders Right: Full height cavity sliders incorporating 70mm adjustable Mini-Louvres provide perfect control day or night.

Shutters Top hung 70mm adjustable Mini-Louvre shutters providing light control, ventilation, privacy and security. A modern product, functioning perfectly within traditional kauri double hung windows.

Hinged Doors End Fixed 70mm Airfoils used in standard aluminium shopfront frame to make French Doors. Coupled with End Fixed 120mm Airfoils for permanent ventilation.

Commercial

While controlling light and assisting in reducing energy costs, Louvres can alter an entire facade or provide a striking architectural feature.

Sliding Gate

Mechanically sliding gates featuring End Fixed 120 Airfoils in aluminium frame.

Adjustable Fence

Adjustable 120 Airfoils provides screening and privacy to an inner city home.

Hinged Gate

The fence is beautifully matched with End Fixed 120 Airfoils in an all aluminium hinged gate.

Doors, Gates & Fences

Versatility - the simple fixing requirements and clean uncluttered lines of our Airfoil Louvres allow for considerable freedom of design and application. Enjoy style with strength, security with function - all important elements in today's world.
